

#1 Crafting the Tree

The Crafted Tree

While in Maker mode, we created a tree from scratch. In this Crafter course, we will be using a **pattern** and creating a Blu-ti-ful Tree from fabric. This is considered a wall hanging. Manageable for students and can be completed in a much shorter time than a full size quilt. It's a great place to start learning about sewing and quilting.

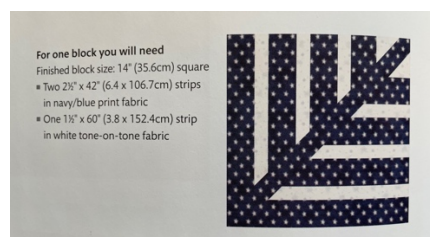

Steam is a school program. Alfie made a video about this... here is it

<https://youtu.be/4VF5SokT3Z8>

Using **STEAM** – we will combine our **scientific knowledge** of a natural tree, choose fabric colors, sew, then we will use our knowledge of the **Element and Principles of Art** to create an original tree from fabric.

The project is shown in three videos. (See three videos next)

In our quilting resource book we located a pattern named Kogin. Use your imagination and discover how this block looks like the branches of an evergreen tree. Here are pictures.

There is also a quilt block in our book named Sycamore, A Walk in the Woods and Sunshine in the Forest. Others quilt blocks you might like from the internet are: Patchwork Forest, Wonky Christmas Trees and lots of seasonal ideas.

on to becoming an Artist.
