

# #1. Maker (a person who is passionate to explore materials and what they can do.)

---

## The House: Lesson

A house is made of shapes. And those shapes can be designed with all kinds of patterns and textures – from a simple townhouse, to a haunted house, to a quilted house – to an artistic display of your “house” imagination.

First: we are providing a black and white drawing of a simple house to color, use construction paper or paint. It’s here (a smaller version) and again in download patterns.

house for makers

haunted house from papers

pattern for fabric house

If you printed out the House picture under our downloads... stop and think before you take the next step. What colors will you use? What textures can you add: stone, bricks, siding or shingles to the roof...

What address number will be on the house?

Will there be a flower boxes or decorations around or inside the windows?

Are you celebrating a holiday?

How about Landscaping? Tree, bushes, flowers are a nice detail.

Wait! Maybe this house is actually a store. How can you show this idea?

As a Maker, you can certainly draw your own house, building, or even a barn.

Let's watch Alfie, the Alpaca, make fun of us in the next video.
